PROJECTS

VC-Lab AI Venture Capital Due Diligence Platform (GitHub Live Demo Website)	2026
Python • Streamlit • Pandas • Plotly • OpenAI GPT • Claude • Financial Modeling	
• Built an AI-powered venture capital due diligence platform replicating end-to-end startup evaluation workflows across sourcing, screening, valuation and portfolio analysis.	
• Developed an AI-powered workflow that extracts startup information from company websites and automatically populates investment screening models.	
• Implemented VC scorecards, VC Method valuation, cap table modeling , portfolio IRR/MOIC analysis and automated investment memo generation within a unified dashboard.	
• Designed a modular AI and financial modeling architecture enabling scalable integration of future LLM-based due diligence agents.	
Solar Energy Solutions for Residential Buildings	2024
Excel • Financial Modeling • DCF • IRR • Sensitivity Analysis	
• Developed and presented a team-based business proposal on residential solar solutions at the ICAI Orientation (GMCS/MCS), leading the financial viability analysis and earning Best Business Proposal (Rank 1/12) for strategic depth and financial evaluation	
• Built a financial model projecting 10-year cash flows for residential adopters , including installation, maintenance, and energy savings, demonstrating a break-even point of 5 years for urban households with 12% IRR (vs. 8% fixed deposit alternative)	
• Built DCF and IRR models with sensitivity analysis across 20+ variables to evaluate subsidy, efficiency and adoption scenarios.	

WORK EXPERIENCE

Price Waterhouse Chartered Accountants LLP, Mumbai	Apr 2022 – May 2026
Management Consultant Finance Transformation & GCC Advisory	
• Designed and implemented an enterprise-wide performance management framework for a leading electronics retailer, delivering six executive dashboards and 70+ drill-down reports that enabled ₹20 Cr working capital optimization through DSO reduction and supplier payment improvements.	
• Redesigned FP&A reporting for an aerospace & defence client by leveraging LLMs to streamline workflow redesign and variance analysis, improving reporting accuracy, saving 50+ hours of manual effort and accelerating management reporting by one month.	
• Supported Global Capability Center (GCC) transformations by standardizing 10+ finance processes , creating governance frameworks and SOPs, reducing turnaround time by 35% while enabling scalable shared services operations.	
• Enabled Day 1 finance operations during a major transformation by reducing financial close timelines from 7 days to 1 day and establishing governance controls supporting 100+ employees through organizational transition.	
Articled Assistant Assurance	
• Streamlined audit cycles through early reconciliation and close schedule reviews, improving reporting accuracy and reducing last-minute fixes; Earned PwC’s “Above & Beyond” recognition (Top 5% of associates)	
• Implemented a front-loading strategy by completing substantive testing during interim audits, validating key reconciliations early, and enforcing a First Time Right data approach to eliminate year-end bottlenecks and reduce sign-off timelines by 4 days	

LEADERSHIP & COMMUNITY IMPACT

Volunteer, PwC Foundation, Mumbai	2022 – 2026
• Led community engagement initiatives through quarterly educational workshops for underprivileged children and monthly beach cleanup drives, promoting education and environmental sustainability.	
• Delivered quarterly workshops for 100+ underprivileged children and mentored 45+ women in professional development , strengthening employability and workplace readiness.
